

Helping you, help your patients:

Next Genetics' mission is to converge the latest scientific and technological advancements in reproductive genetic testing with excellent support and care from our medical, clinical and specialist teams.

The Next Genetics team are there to ensure that both you and your patients feel supported and valued throughout the process with us and that results are released to you timeously.

How the Next Genetics team supports both you and your patient:

In-field Nurse Support Network:

Personalised in-field nurse support team offering a bespoke blood draw service for your patients, enabling convenient blood draws in the comfort of their own home or at a site most suitable for them.

Specialist Support:

A qualified team of genetic specialists in-field and supporting from head office to assist both you and your patients through their NIPT journey.

Client Services Support:

Hands-on client services team that is trained to provide one-on-one assistance to you and your patient with:

- Payments/medical aid approval & submission process
- Logistics coordination and blood draw arrangements
- Help and guidance with navigating the NIPT process

Clinical Support:

Clinical support team available to support both you and your patients with pre- and post-test guidance and information, offering a free genetic counselling session for all high risk NIPT results.

Technical Lab Support

HPCSA-registered lab team implementing the best available Illumina NGS technology for comprehensive in-house genomewide analysis of foetal chromosome anomalies.
