

## Umbilical Cord Blood Serum Eye Drops

Umbilical Cord Blood Serum Eye drops are used in the treatment of Ocular Surface Disorders by accelerating the regeneration of the corneal epithelium and lubricating the eye.

### STORAGE

01

#### OptiSerum Eye Drops

can be stored as follows until time of use:

Home Freezer (- 20°C)	1 year from date of manufacture or within expiry date printed on the bottle label.	
Home Refrigerator (4 – 10°C)	Use within 7 days of opening/thawing.	

### THAWING INSTRUCTIONS

02

1. If Frozen: Remove OptiSerum bottle from freezer and allow to thaw at room temperature. DO NOT thaw in microwave or boiling water. Once thawed, immediately place the bottle in the refrigerator.
2. When opened, the eye drops must be kept at 4-10°C and used within 7 days.

- Do not use if the solution becomes cloudy
- Do not use if the tamper-proof seal on the bottle neck is broken before first use
- Store in original packaging
- Keep the container tightly closed
- Do not use after expiry date stated on the label / carton / bottle
- Keep out of reach of children

### HOW TO APPLY

03

Apply 1 drop in the affected eye/eyes, 4 times a day or as otherwise prescribed. Your doctor will tell you how long your treatment will last.

To avoid contamination of your eye drops, do not let the bottle tip touch your eye or any surface. Always wash your hands before applying eye drops.

1. Tilt your head back and look at the ceiling. Hold the bottle with the tip down, over your eye.
2. Gently pull the lower eyelid down, until there is a small pocket between the eyelid and the eyeball.
3. Squeeze the dropper bottle to release a drop into your eye.
4. Replace and tighten the cap immediately after use and place the bottle back in the fridge at 4-10°C.
