

Agreement between: -
Netcells Stem Cells (Pty) Ltd herein referred to as: **Netcells**
and **The Client**

1. Interpretation

1.1 Definitions:

- 1.1.1 "the Act" means the South African National Health Act, 61 of 2003 (as amended);
- 1.1.2 "the/this Agreement" means this Community Cord Blood and Cord Tissue Storage and Related Services Agreement, including the Informed Consent, the Client Registration Form and such terms and conditions on the Netcells website which relate hereto;
- 1.1.3 "Ampath" is Ampath, a group of amalgamated pathology practices that previously functioned independently and subsequently joined to form the incorporated practices' of Drs Du Buisson, Kramer, Swart and Bouwer;
- 1.1.4 "Authorised Organisation, Institution or Person" means an organisation, institution or person authorised in terms of the Act and Regulation 183 on Stem Cells Banks to conduct the activities referred to in paragraph 2 of Regulation 183 (which are amended from time to time) or any other internationally accredited establishment;
- 1.1.5 "Autologous" means for use by the Child only;
- 1.1.6 "Allogeneic" means for use by another individual;
- 1.1.7 "Age of Majority" means, in terms of the Children's Act, 38 of 2005 (as amended), 18 (eighteen) years of age or older;
- 1.1.8 "AML" means Acute Myeloid Leukaemia, a type of cancer of the blood and bone marrow;
- 1.1.9 "Child" means the child who is born and from whose umbilical cord the Cord Blood and Cord Tissue Stem Cells are collected;
- 1.1.10 "the Client" means the Mother, subject to the following:-
- 1.1.10.1 where the Mother is deceased, the Father of the Child shall automatically be deemed from the date immediately prior to the death of the Mother, to be the Client; or
 - 1.1.10.2 where the Mother and Father of the Child are both deceased, the legal guardian of the Child shall automatically be deemed to be the Client with effect from the date immediately prior to the date of the last deceased; or
 - 1.1.10.3 where the Child attains the Age of Majority, the Child shall be deemed to be the Client with effect from the date of attainment;
- 1.1.11 "Client Registration Form" means the Netcells Community Client Registration Form (NC-CLI-FRM-020) required to be completed by the Client in order to register with Netcells for Cord Blood and Cord Tissue Storage;
- 1.1.12 "CMV" means Cytomegalovirus- a herpes type virus;
- 1.1.13 "Collection Kit" means a collection bag with two needles (for Cord Blood), a vial with saline solution (for Cord Tissue), tubes for maternal blood collection, sterile cleaning material, a temperature insulating bag, a carrier box provided by Netcells to transport the Cord Blood and Cord Tissue and any relevant documentation for the Client which is to be completed and returned to Netcells;
- 1.1.14 "Netcells Community Bank" means the Netcells umbilical cord blood and tissue banking model which stores the cord blood unit for use by the Client, but simultaneously the unit is placed on the donor registry with South African Bone Marrow Registry (SABMR) for use by a recipient in need should a tissue match be identified by SABMR;
- 1.1.15 "CFU assay" means Colony-Forming Unit assay, a test done on the cord blood to measure the proliferation and differentiation ability of individual cells within the cord blood sample;
- 1.1.16 "Chagas Disease" means a tropical parasitic disease caused by *Trypanosoma cruzi*, which is found in the faces of Triatominae bugs or "kissing bugs". It is spread by these bugs mostly from areas in South and Central America and Mexico;
- 1.1.17 "Cord Blood" means the Cord Blood that contains the Haematopoietic Stem Cells and other cells extracted from the umbilical cord and placenta of the Child;
- 1.1.18 "Cord Tissue" means the Cord Tissue that contains the Mesenchymal Stem Cells and other cells contained in the umbilical cord;
- 1.1.19 "Commissioning Parent" means the parent wishing to have a child as a result of an agreement of surrogacy;
- 1.1.20 "Competent Person" means a medical practitioner who by qualification is competent to advise and/or administer a Stem Cell transplant;
- 1.1.21 "COVID-19" means an infectious Coronavirus disease caused by a newly discovered coronavirus, SARS-COV2 which is mainly transmitted through droplets generated when an infected person coughs, sneezes, or exhales;
- 1.1.22 "Cryopreservation" means cooling of the Stem Cells to a temperature of less than -150 degrees Celsius and maintaining it at this temperature;
- 1.1.23 "Days" means any day other than a Saturday, Sunday or official public holiday in the Republic of South Africa;
- 1.1.24 "Donate" means to give, freely and voluntarily;
- 1.1.25 "EBV" means Epstein-Barr Virus which is a double stranded herpes DNA virus that causes infectious mononucleosis (also known as Mono);
- 1.1.26 "Failed" sample means when insufficient cells are present for processing and storage;
- 1.1.27 "Father" means the man who:
- 1.1.27.1 conceived the Child (biological father) either through natural conception or artificial reproductive technologies (ART); or
 - 1.1.27.2 the legal guardian of the Child, as the case may be (legal father);

Place Barcode Here

Initial

KH *CFD*

- 1.1.28 "Healthcare Professional" means inter alia, an obstetrician, midwife or nurse;
- 1.1.29 "HLA" means proteins found on most cells in your body. Your immune system uses these markers to recognize which cells belong in your body and which do not;
- 1.1.30 "HLA typing" means matching of genetic material to maximize the chances of a successful transplant;
- 1.1.31 "H.I.V." means Human Immunodeficiency Virus 1 and 2 – AIDS-causing virus;
- 1.1.32 "Hepatitis B and C" means Hepatitis B and Hepatitis C viruses that affect the liver causing hepatitis, jaundice and liver dysfunction;
- 1.1.33 "HTLV I and II" means Human T-cell Lymphotropic virus, a type of retrovirus;
- 1.1.34 "Informed Consent" means the informed consent form that is required to be signed by the Client in terms of statute and which is contained in the documents in the Collection Kit;
- 1.1.35 "Malaria" means a disease which is caused by a plasmodium parasite which is spread in humans through the bite of an infected mosquito;
- 1.1.36 "Maternal Bloods" means the blood to be taken from the birth Mother at birth and to be tested for Transmissible Diseases as required in terms of Regulation 183 of the Act and in terms of the American Association of Blood Banks International Accreditation Standards;
- 1.1.37 "Mother" means the woman who:-
 1.1.37.1 gave birth to the Child (birth mother); or
 1.1.37.2 conceived the Child (biological mother) through artificial reproductive technologies (ART); or
 1.1.37.3 is the legal guardian of the Child (legal mother).
- 1.1.38 "Minimum Storage Limits" – Netcells has set its Optimal Storage Limits in line with international best practise on the premise that an UCB unit should be suitable to treat a patient 10kg and greater. Samples will be assessed according to the CD45+ (Total Nucleated Cell) count, and the CD34+ (Haematopoietic progenitor cell) count. These counts must be equal to or over 100 000 000 and 200 000 respectively;
- 1.1.39 "Minimum Registry Storage Limits" - SABMR has set its Optimal Storage Limits in line with international best practise on what is deemed optimal for donation of a UCB unit. Samples will be assessed according to the CD45+ (Total Nucleated Cell) count and recovery percentage (equal to or over 500 000 000 and over 60% recovery), the CD34+ (Haematopoietic progenitor cell) count and viability percentage (equal to or over 1 250 000 and over 85% viability), positive growth of colony forming units (CFUs), and no presence of antibiotic resistant bacteria and fungus;
- 1.1.40 "MDS" means Myelodysplastic Syndrome which is the name for a group of disorders caused by a disruption to the production of blood cells;
- 1.1.41 "Netcells" means Netcells Stemcells (Proprietary) Limited (Registration No. 2016/01111/07), and its respective shareholders, directors, officers, employees and agents including marketing agents and other representatives. Netcells is a company duly registered and incorporated according to the company laws of the Republic of South Africa;
- 1.1.42 "Oncolab" means the Oncolab Pathology Laboratory based in Netcare Pretoria East Hospital which will be performing the HLA typing and CFU Assay on the cord blood unit;
- 1.1.43 "Parents" means collectively the Mother and the Father, who are jointly and severally liable under this Agreement, for any and all amounts owing in terms hereof;
- 1.1.44 "Partial Surrogacy" refers to surrogacy where the Surrogate Mother is the genetic parent of the child;
- 1.1.45 "Processing fee" is the fee that covers the processing and testing of the stem cells as well as the maternal blood test costs;
- 1.1.46 "Processing/Process" means all operations involved in the preparation, isolation, extraction, and cryopreservation of the Stem Cells from the Cord Blood and/or Tissue;
- 1.1.47 "Processing Laboratory" means the laboratory where Cord Blood and/or Cord Tissue is processed and the Stem Cells cryopreserved and stored;
- 1.1.48 "Recipient" means a patient in need of a stem cell transplant as identified by SABMR;
- 1.1.49 "SABMR" means the South African Bone Marrow Registry which is a non-profit organisation conducting highly specialised searches to find matching bone marrow donors for critically ill South African children and adults;
- 1.1.50 "SANBS" means South African National Blood Service which is a not-for-profit organisation which provides blood products and services;
- 1.1.51 "Stem Cell(s)" means a cell that has the capability of differentiating into a specialized cell of the body and producing a daughter Stem Cell (i.e. capable of self-renewal) that are extracted from the umbilical Cord Blood and/or Cord Tissue;
- 1.1.52 "Syphilis" means a contagious disease that is characterised by genital ulcers, skins rashes and lesions that can affect all organs of the body;
- 1.1.53 "Storage/Storing/Store" means maintaining the Stem Cells under appropriate controlled conditions, cryopreserved at less than -150° Celsius;
- 1.1.54 "Storage Period" means any storage period opted and paid for and decided on by the client, as indicated in the Client Registration Form. Notification of expiry of the contract will be sent in terms of the Consumer Protection Act prior to expiry date;
- 1.1.55 "Storage Facility" means the Cryopreservation storage tank in which the Stem Cells are stored and the facility in which it is located;
- 1.1.56 "Suboptimal Limits" - If a sample is shown to have either or both limits below the minimum limit, the sample is deemed to be "sub-optimal". A sub-optimal unit will be stored, but the client needs to sign a disclaimer acknowledging that they understand that the sample is sub-optimal. The client has the option NOT to store the sample and will have to sign a disclaimer to destroy the sample. The client will be refunded the processing and storage fee of that sample;
- 1.1.57 "Surrogate Mother" means an adult woman who enters into a surrogate motherhood agreement with a commissioning parent;
- 1.1.58 "Signature date" means the date of signature of this agreement by the last party to sign;

Initial

KH CFA

- 1.159 "Testing/Test" means (subject to the context of use of such term):-
 - 1.159.1 maternal blood tests performed on the Mother (in the case of the carrier of the Child) using serology and NAT (nucleic acid) testing and tested for Transmissible Diseases ("Maternal Blood Tests"); and/or;
 - 1.159.2 laboratory tests conducted on the Cord Blood and/or Cord Tissue (including flow cytometry tests and sterility tests) ("Cord Blood and/or Cord Tissue Tests");
 - 1.159.3 external laboratory tests conducted by Oncolab, on behalf of SABMR, on the cord blood to determine the tissue type (HLA) of the child ("HLA typing test") as well as the Colony Forming Units (CFU) of the cord blood sample;
- 1.160 "Therapeutic" means relating to the proposed treatment of a potential recipient with the donated unit of cord blood from the Client with an established use for umbilical cord blood;
- 1.161 "Toxoplasmosis" means a disease which results from an infection from a parasite called *Toxoplasma gondii*. Infection usually occurs by eating undercooked contaminated meat, exposure from infected cat faeces, or mother-to-child transmission during pregnancy;
- 1.162 "TB" means Tuberculosis which is an infectious bacterial disease that mainly affects the lungs. It is spread through droplets in the air after an infected persons coughs or sneezes;
- 1.163 "Transmissible Diseases" means:-
 - 1.163.1 H.I.V. -1 and -2 (Human Immunodeficiency Virus);
 - 1.163.2 Hepatitis B and Hepatitis C viruses;
 - 1.163.3 Human T- lymphotropic viruses I and II;
 - 1.163.4 Syphilis;
 - 1.163.5 CMV (Cytomegalovirus);
 - 1.163.6 Toxoplasmosis;
- 1.164 "venipuncture" means inserting a needle into a peripheral vein of the birth mother drawing a blood sample;
- 1.165 "West Nile Virus" means a virus that causes West Nile Fever, which is primarily transmitted via a mosquito;
- 1.166 "Zika Virus" means a virus which is spread by daytime-active Aedes mosquitoes. In most cases, there are no symptoms, but in few cases, Zika can trigger paralysis (Guillain-Barré Syndrome) and birth defects if it affects a pregnant women.
- 1.2 Any reference to an enactment, regulation, rule or by-law is that enactment, regulation, rule or by-law as at the signature date, and as amended from time to time.
- 1.3 All amounts payable in terms of this Agreement are inclusive of VAT (value added tax) unless otherwise indicated.
- 1.4 This Agreement shall be governed by the laws of the Republic of South Africa.

2 PREAMBLE

- 2.1 The Client has requested and consented to the registration, processing and storage of Stem Cells obtained from Cord Blood and Cord Tissue collected from the umbilical cord and placenta at the time of the birth of the Child.
- 2.2 The Client intends to store the Stem Cells acquired from the Cord Blood and Cord Tissue, for the benefit of the Child or any other party that the Client expressly and in writing elects to donate the Stem Cells to, or to a patient in need of a transplant as identified by SABMR, which the client will consent to expressly and in writing and be refunded the full stem cell banking fee they paid.
- 2.3 The Client authorises Netcells to Process, Test and Store such Stem Cells in terms of this Agreement and the signed Informed Consent.

IT IS NOW AGREED:

3 OWNERSHIP

- 3.1 Subject to the order of any court of competent jurisdiction, and to the terms and conditions of this Agreement, all rights, title and interest in and to the Cord Blood and Cord Tissue and Stem Cells derived therefrom shall, vest exclusively with the Client.
- 3.2 All such rights, title and interest shall cede to the Child, at the date at which the Child attains the Age of Majority.
- 3.3 In the event that Netcells receives notification of a tissue match for a patient in need from SABMR, Netcells shall notify the Client of the match and the client then consents expressly and in writing, to donate the stem cells to the patient in need. Once consent has been given by the client for use of the stem cells, ownership of the stem cells shall vest with the patient in need.
- 3.4 In the event the cord blood unit be donated to a recipient in need and the donor child falling ill following the use of his/her stem cells, if the donor child and SABMR receives instruction from his/her treating physician and transplant centre which indicates that the child requires a stem cell transplant, the child will have access to the donor registry and SABMR's resources to assist in finding a potential cord blood unit match or an adult donor within their repository.

4 COLLECTION OF THE MATERNAL BLOOD AND CORD BLOOD/TISSUE

The Client undertakes:-

- 4.1 to consult with the relevant Healthcare Professional, and make the necessary arrangements to ensure that the Maternal Blood and Cord Blood and Cord Tissue is collected and properly packaged in the Collection Kit, strictly in accordance with the instructions provided therein by Netcells;

Place Barcode Here

Initial

KH *CFD*

- 4.2 to contact Netcells as soon as reasonably possible after the collection of the Cord Blood and Cord Tissue, to ensure that a reasonable time is afforded to Netcells to arrange a courier to transport the Cord Blood and Cord Tissue to the Netcells laboratory within 48 (forty-eight) hours of the collection of the Cord Blood and Cord Tissue.
- 4.3 Netcells shall not be held responsible for any compromise to the integrity of the Cord Blood and Cord Tissue during such collection.

- 6.1.8 less than 40 ml of the cord blood is received and after preliminary Testing thereof, is deemed to be sub-optimal, subject to further options as contemplated in clause 8.1.3. below;
- 6.1.9 less than 10 cm of the umbilical Cord Tissue is received for storage;
- 6.1.10 once processed, the number and/or viability of the Cord Blood and the viability of the Cord Tissue Stem Cells falls below the minimal requirements for storage as defined by Netcells.

5 TRANSPORTATION OF THE CORD BLOOD AND/OR CORD TISSUE UNIT

- 5.1 Once the Cord Blood and Cord Tissue has been collected by the Healthcare Professional, the Client will contact Netcells telephonically to arrange for the courier.
- 5.2 The courier shall transport the Cord Blood and Cord Tissue to the Netcells laboratory.
- 5.3 Netcells shall not be held responsible for any compromise to the integrity of the Cord Blood and Cord Tissue during such transportation, which is beyond its control.

7 NOTIFICATION

- 7.1 Once the Cord Blood and Cord Tissue Tests have been taken and/or the Stem Cells Cryopreserved and stored, Netcells shall notify the Client in writing whether:-
 - 7.1.1 the Cord Blood and/or Cord Tissue Stem Cells are suitable for storage, in which case they will be stored in terms of this Agreement; or
 - 7.1.2 the Cord Blood is suitable for use on the donor registry, in which case they will be stored in terms of this Agreement; or
 - 7.1.3 the Cord Blood and/or Cord Tissue Stem Cells are sub-optimal according to the minimum storage limits defined by Netcells, in which case the Client has the option to elect to:-
 - 7.1.3.1 continue storage of the Stem Cells; or
 - 7.1.3.2 destroy the Stem Cells; or
 - 7.1.3.3 donate them for internal research and/or validation purposes.
- 7.1.4 the Cord Blood and/or Cord Tissue Stem Cells are deemed as "failed", the Cord Blood and/or Cord Tissue Stem Cells will be discarded.
- 7.1.5 In Clause 7.1.2, the Client's express written authorisation therefore will be obtained and the Client will be required to sign the necessary disclaimer.
- 7.1.6 The Cord Blood Stem Cells are contaminated by a bacteria or fungus during the birth.
- 7.1.7 In the event that either the Cord Blood and/or Cord Tissue are sub-optimal, the Client will still be liable for payment of the processing and storage fees of the optimal Cord Blood and/or Cord Tissue.
- 7.1.8 In the event that one parent is listed as the preferred contact person, Netcells shall fulfil its responsibility in terms of notification by contacting only that parent. Netcells reserves the right to contact the other parent if legally required and/or at its own discretion.

6 PROCESSING OF THE CORD BLOOD AND/OR CORD TISSUE UNIT

- 6.1 Netcells undertakes to Process the Cord Blood and Cord Tissue and Store the Stem Cells. Netcells reserves the right to refuse to Process and Store the Cord Blood and Cord Tissue in the following circumstances:-
 - 6.1.1 the requisite Netcells Agreement and Informed Consent have not been completed, have been incorrectly and/or inadequately filled out or have not been signed, and/or;
 - 6.1.2 the requisite Maternal Health and Family History Questionnaires and Birth Identification Form have not been completed, have been incorrectly completed or any information falsely represented and/or inadequately filled out or have not been signed, and/or;
 - 6.1.3 if the Cord Blood and/or Cord Tissue cannot be conclusively traced back to the original donor through no fault of Netcells, and/or;
 - 6.1.4 if it is suspected that the Cord Blood and Cord Tissue has been compromised by contact with bodily fluids from any other person through no fault of Netcells, and/or;
 - 6.1.5 the registration fee has not been paid, and/or;
 - 6.1.6 the requisite Maternal Blood Tests, have not been complied with, or as a consequence of Testing, the presence of Transmissible Diseases is detected, and/or;
 - 6.1.7 the Cord Blood and/or Cord Tissue has been contaminated for any reason; and/or

8 STORAGE OF THE STEM CELLS

- 8.1 Netcells shall Store the Stem Cells according to set requirements as contained in Netcells Cord Blood and/or Cord Tissue Specification Sheets for the Storage Period.
- 8.2 Netcells undertakes to contact the Client 40 (forty) to 60 (sixty) days prior to the expiration of the Storage Period, and the Client will have the option to elect to:-
 - 8.2.1 continue Storing the Stem Cells, in which case Netcells shall invoice the Client for the storage thereof at its then current rates, which will be market related; or
 - 8.2.2 terminate this Agreement in accordance with Clause 14.3.

Place Barcode Here

Initial

KH CFA

- 8.3 The Client (or Child obtaining the Age of Majority), in consultation with the Competent Person, may elect to retrieve the Stem Cells from storage in accordance with Clause 9, as and when deemed necessary.
- 8.4 SABMR will contact Netcells when a match to a patient in need of the UCB stem cells is identified, after which Netcells will contact the Client to inform them of the upcoming use of the stem cells. Should the client refuse to give up the stem cells for use by SABMR, the client will be charged a penalty fee equivalent to the full value of Private Stem Cell Banking with Netcells, at the time the stem cells are requested. This penalty fee is over and above what was paid initially to bank with the Community Bank.
- 8.5 Netcells shall be entitled to transfer the stored Stem Cells to an Authorised Organisation, Institution or Person in South Africa, internationally or relocate its own storage facility at any time after furnishing the Client with written notice thereof.
- 8.6 In the unlikely event that Netcells ceases to continue trading for any reason, Netcells has contracted its obligations in terms hereof out to an independent Authorised Organisation, Institution or Person, who will ensure the ongoing storage of the Stem Cells in terms of this Agreement.
- 8.7 Should the cord blood unit fit any of the below criteria, the sample will not be able to be listed on the SABMR donor registry:-
 - 8.7.1 the cell count is below the minimum registry storage limits as defined by the SABMR;
 - 8.7.2 it is contaminated by any fungus;
 - 8.7.3 it is contaminated by a bacteria which is not sensitive to antibiotic treatment.
- 8.8 Should the mother test positive for one of the following at the time of birth, the cord blood unit will not be able to be listed on the SABMR donor registry:-
 - 8.8.1 H.I.V,
 - 8.8.2 Hepatitis B or C
 - 8.8.3 HTLV I or II
 - 8.8.4 CMV
 - 8.8.5 Malaria
 - 8.8.6 Syphilis
 - 8.8.7 Toxoplasmosis
 - 8.8.8 Chagas Disease
 - 8.8.9 Zika, Epstein-Barr or West Nile virus
 - 8.8.10 Tuberculosis

9 RETRIEVALS FOR TRANSPLANT (PREPARATION, TRANSFER & SHIPMENT)

- 9.1 Should the Client wish to retrieve the stored Stem Cells, the Client shall provide Netcells with a minimum of 30 (thirty) day's written notice of the intended transplant date.
- 9.2 The notice in terms of Clause 9.1 shall include details and contact numbers of the Competent Person and Authorised Organization, Institution or Person receiving the Stored Stem Cells and any such other information as may be required by Netcells to transfer the Stem Cells in a manner that ensures their integrity.

- 9.3 In the case of Cord Blood, the Stem Cells are ready for use and will be transported in their frozen state to the place of transplant. The transplant centre may however require the Stem Cells to be washed and if this service is requested to be carried out by Netcells, there will be an additional charge for this service. The Stem Cells will then be transported in a non-frozen state to the place of transplant. In the event of additional technology being offered, these services will be charged for.
- 9.4 In the case of Cord Tissue, additional laboratory work is required to thaw the cord tissue and isolate the Stem Cells from the Wharton's Jelly. Depending on the treatment required, the Mesenchymal Stem Cells will require additional expansion and other laboratory work in order to prepare the therapeutic required. This service is not currently provided by Netcells and the cost of this additional laboratory work will be for the Client's own account. It must be noted that not all umbilical cords yield stem cells that can be cultured, due to patient biological variability.
- 9.5 The Client shall provide Netcells with a signed authorisation within 7 (seven) days of the intended transplant date, by the transplant physician for release of the Stem Cells by Netcells.
- 9.6 Netcells undertakes to release the Stem Cells timeously and to ensure timeous delivery to the transplant centre.
- 9.7 Provided that the Stem Cells are used for transplant, there will be no cost for retrieval, however the cost of transport, testing and all related treatment costs of the Stem Cells will be for the Client's own account. If the Stem Cells are retrieved for any other purpose, which is not transplant related, a retrieval fee will be applicable for the Client's own account.
- 9.8 If the Stem Cells are retrieved at any time prior to the paid-up Storage Period, the Client will be refunded the proportionate amount of unutilised storage fees.
- 9.9 The Client will be liable to settle the processing and utilised storage fee in full if the Stem Cells are retrieved before the expiration of any selected payment plan period. If the Stem Cells are retrieved and used by the Child or related sibling in a transplant during the first year of storage, a full refund of the processing & storage fee will be given to the Client.
- 9.10 In the event of a Recipient being identified, Netcells will contact the Client to advise that the cells need to be retrieved for transplant to a Recipient. The Client agrees to respond to Netcells in writing, within 14 (fourteen) days of notification from Netcells. The response provided will confirm or refuse consent to the retrieval. If the Client refuses consent, the Client will be liable to make payment to Netcells as per clause 8.4.9.11.
- 9.11 Cord Blood Units required for use by a Recipient on the donor registry may undergo additional tests prior to release to the transplant physician/clinic, based on their requirements.

10 TERMS AND CONDITIONS OF PAYMENT

- 10.1 The total cost of this service is set out in the Client Registration Form and which is to be paid by the Client as follows:-
 - 10.1.1 the Registration Fee shall be payable by the Client to Netcells upon registration and prior to the delivery of the Netcells Collection Kit;
 - 10.1.2 the processing & storage fee shall be due and payable once the Client has received notification (meaning confirmation of storage by Netcells together with issue of the Cord Blood and/or Cord Tissue Test results certificate) of the storage of the Stem Cells.

Place Barcode Here

Initial

KH CFA

- 10.2 Included in the Registration Fee in Clause 10.1.1 above, is the normal cost of a courier. Any additional or special courier charges (public holidays, outlying areas, express delivery) shall be pre-authorized and separately invoiced to the Client.
- 10.3 Included in the processing & storage fee in Clause 10.1.2 above, is the cost for the testing of Maternal Blood. Should the Maternal Blood not be collected at birth and couriered with the Cord Blood and/or Cord Tissue or should there be insufficient blood and additional Maternal Blood is required, the costs of withdrawing the Maternal Blood and couriering it (separately from the Cord Blood and/or Cord Tissue to the Netcells laboratory, will be for the Client's own account. Where a pregnancy is assisted by surrogacy, the Maternal Blood will need to be collected from the Surrogate Mother.
- 10.4 The Client may select to pay the processing and storage fee in accordance with a monthly payment plan as indicated in the Client Registration Form. In this case, a compulsory debit order authorisation form needs to be signed and should this be returned by the bank for any reason whatsoever, the Client will be liable to pay a debit order rejection fee of R100 (one hundred Rand). By signing this Agreement the Client confirms that the Parents have the necessary funds and cash flow to service the monthly repayments and that this repayment commitment cannot be deemed to be a reckless extension of the Parents financial obligations.
- 10.5 Where a pregnancy has been assisted by partial surrogacy and the Surrogate Mother exercises her right to terminate the surrogacy agreement within 60 (sixty) days of the child being born, the commissioning parent will be responsible to pay the processing and storage fees in full and to recover these funds from the Surrogate Mother as expenses incurred in terms of the agreement.
- 10.6 All overdue amounts shall bear interest at a rate equivalent to the aggregate of the publicly quoted prime overdraft lending rate charged by the Standard Bank of South Africa plus 2% (two percent).
- 10.7 The Client acknowledges that the failure to effect payment of any fee or cost timeously may result in the termination of this Agreement by Netcells in terms of Clause 14.3, after written notice to the Client.

11 WARRANTIES

- 11.1 The Client acknowledges that Netcells has not made and does not make any representations or warranties to the Client, whether express or implied, of any kind or nature, including, without limitation of the foregoing, with respect to:-
 - 11.1.1 the suitability of the Cord Blood and/or Cord Tissue or Stem Cells derived therefrom for the future treatment of any disease, illness, injury or any other medical affliction;
 - 11.1.2 the successful treatment of any disease, illness, injury or any other medical affliction through Stem Cell transplantation;
 - 11.1.3 the advantages of transplanting Stem Cells derived from Cord Blood and/or Cord Tissue over other types of treatment using Stem Cells derived elsewhere.

12 LIMITATION OF LIABILITY

- 12.1 Notwithstanding anything that may be construed to the contrary in terms of this clause 13, the maximum amount of any and all liability which Netcells (and its respective shareholders, directors, officers, employees and agents, including marketing agents and other representatives) may incur to the Client in terms of this Agreement, or in respect of any and all actions or omissions of Netcells under any and all circumstances shall be the total amount paid by the Client to Netcells as set out hereunder.
- 12.2 The Client further acknowledges that Netcells shall not be held responsible for the actions of any other party, which includes, but is not limited to: SABMR, physicians, nurses, midwives, the birthing hospital or medical facility, hospital or medical facility staff, the couriers and transporters of the Cord Blood and/or Cord Tissue and Stem Cells.
- 12.3 Netcells shall not be liable to the Client or any other third party for any direct, indirect special, punitive, consequential or incidental damages or losses.
- 12.4 Netcells shall not be held liable for any loss or damage to the Cord Blood and/or Cord Tissue or Stem Cells derived therefrom which may be caused by any event beyond its control and/or which is considered to be a force majeure event.

13 ASSIGNMENT

Netcells may:-

- 13.1 transfer the location of the Processing Laboratory, and/or;
- 13.2 transfer the Storage Facility, and/or;
- 13.3 cede and assign any and all of its rights and obligations under this Agreement to an Authorised Organisation, Institution or Person after prior written notice is furnished to the Client on condition that the Client is given full details of the Authorised Organisation, Institution or Person in advance.

The Client may:-

- 13.4 after giving prior written notice to Netcells, transfer to one or more persons his or her rights under this Agreement at any time, in particular upon the Client's death or disablement. No transfer shall take effect until such time as the transferee or successor consents, in writing, to the transfer and thus agrees to be bound by this Agreement. Should the Client be deceased or disabled and should there be no transferee or successor to the Client's rights, Netcells may, in its entire discretion, recognise the authority of any other person to represent the Client.

14 TERMINATION

- 14.1 Netcells reserves the right to terminate this Agreement in the following circumstances:-
 - 14.1.1 failure of the Client to provide the Cord Blood and Cord Tissue, and/or the Maternal Bloods and/or the information that Netcells requires for the performance of its services or compliance with the relevant law, regulations or accreditation;

Place Barcode Here

Initial

KH CFA

- 14.1.2 receipt of the results of the Maternal Blood Tests, and according to Netcells' internal quality and accreditation requirements or the relevant government regulations or statute, indicating that the Cord Blood and Cord Tissue is not appropriate for storage;
- 14.1.3 should Netcells be unable to extract any Stem Cells from the Cord Blood, or should the Cord Blood yield insufficient Stem Cells according to Netcells internal quality and accreditation requirements, then no storage shall take place, and accordingly, the Client shall not incur any liability in regard to the processing & storage fee;
- 14.1.4 in the event that any payment due has not been received within 30 (thirty) days after the date of written notification to the Client to effect payment;
- 14.1.5 in the event of the Client not responding to Netcells within 6 (six) months after the expiration date of the Storage Period, despite Netcells having notified the Client at least twice, within 6 (six) months prior to the date of expiration and once within the 6 (six) months after expiration.
- 14.2 The Client may terminate this Agreement at any time upon written notice to Netcells in the event of:
 - 14.2.1 the Client terminating prior to the birth of the child, the client will be refunded the proportionate unutilised portion of the registration, processing and storage fee.
 - 14.2.2 the client terminates after the birth of the child, where the stem cell kit has been used and/or processing of the stem cells has taken place; the client will be liable for the registration and processing fees and will be refunded the unutilised portion of the storage fee.
- 14.3 On termination, the Client can elect that stored Stem Cells are:
 - 14.3.1 transferred to SABMR (once all outstanding fees have been paid); or
 - 14.3.2 donated for internal research and/or validation purposes, if the sample was deemed sub-optimal at time of storage.
- 14.4 Notwithstanding the foregoing, this Agreement will be terminated on withdrawal by the Client of all his/her stored Stem Cells (for personal or recipient use) for transplant and any unutilised storage fees will be refunded. The client will be liable to settle the storage fee and utilised storage fee in full if the agreement is terminated before the expiration of any selected payment plan period.
- 14.5 The ownership of the biological material stored vests entirely with the client. The client may therefore request that the stored material be released for burial. All aspects of the South African National Health Act 2003 (as amended) or any superseding law must be adhered to at all times during release of the material.

15 MAINTENANCE AND PROTECTION OF CLIENT INFORMATION

- 15.1 The Parents and/or Client undertakes to provide Netcells with complete and accurate contact information of the Parents and/or Client and the child, in writing, as is required by Netcells. The Parents and/or Client also agrees to provide any other information that may be required by Netcells for the Testing of the Cord Blood and/or Cord Tissue, maternal

blood, performance of its services, compliance with the laws, regulations, permits and certifications, as well as for the proper identification of the Parents and/or Client and the Child.

- 15.2 If any information that the Parents and/or Client has provided to Netcells changes or is no longer valid, the Parents and/or Client acknowledges that it is his/her/their responsibility to advise Netcells promptly, and in writing, of all such changes or invalidity.
- 15.3 Netcells shall use all reasonable endeavours to keep confidential all information relating to the Parents and/or Client and/or Child. Personal information will only be held in Next Bioscience's hardcopy files in a locked location and on our secure electronic database and back-up files.
- 15.4 Information or any test results will only be released to the Parents and/or Client and/or Child's Healthcare Professional and/or SABMR and/or Competent Person for their internal confidential records or otherwise as requested by the Parents and/or Client and/or Child in writing. Information may also be released for the purposes of performing Netcells obligations under this Agreement. None of the information held on Netcells' database will otherwise be disclosed or released to any third parties other than SABMR and those required by law.
- 15.5 By signing this Agreement, the Parents and/or Client consents to Netcells and SABMR holding the Parents and/or Client and/or Child's personal data for the purposes of performing Netcells' obligations under this Agreement.
- 15.6 It is the responsibility of the Parents and/or Client to notify Netcells if their child is diagnosed with any genetic or serious medical condition that may affect the use of the Stem Cells in the future.
- 15.7 Netcells may, from time to time, send out electronic information by email, sms or WhatsApp to the Parents and/or Client, to update the Parents and/or Client on developments regarding Netcells and the Stem Cell industry in general. The Parents and/or Client may at any time opt out from receiving this communication by written notification.

16 COMPLIANCE WITH THE PROTECTION OF PERSONAL INFORMATION ACT (POPIA)

- 16.1 The Parent understands that Netcells and the SABMR take the privacy of its clients very seriously and have implemented reasonable security measures to guard against the unauthorised disclosure of private patient information.
- 16.2 The Parent acknowledges that its personal information may be disclosed within the Netcells and SABMR team for the purposes of providing services.
- 16.3 The Parent acknowledges that its personal and special personal information will be kept for the required storage and retention periods according to and in line with legislation/regulations applicable to the medical and healthcare industry.

17 DOMICILIUM AND NOTICES

- 17.1 The parties choose as their domicilium citandi et executandi their respective addresses set out on the Netcells website (in respect of Netcells) and the Informed Consent (in respect of the Client).

<p>18 DISPUTES</p> <p>18.1 In the event of any dispute, disagreement or claim arising between the Netcells and the Client concerning this agreement, the parties shall attempt to resolve the dispute by way of negotiation. This entails that one party invites the other party, in writing, to a meeting to attempt to resolve the dispute within 14 (fourteen) days from date of the invitation.</p> <p>18.2 Failing such a resolution, the dispute, if arbitrable in law, shall be finally resolved in accordance with the Rules of the Arbitration Foundation of Southern Africa (AFSA) by an arbitrator or arbitrators appointed by the Foundation.</p> <p>18.3 The provisions of this clause shall not preclude either the Client or Netcells from access to an appropriate court of law for interim relief in respect of urgent matters by way of an interdict, or mandamus pending finalisation of this dispute resolution process.</p>	<p>19 ENTIRE AGREEMENT</p> <p>19.1 This Agreement, the appendices, all references to terms and conditions contained on the Netcells website and the explanatory terms as contained in the information booklet within the Collection Kit, constitute the entire Agreement between the parties and no warranties, representations or guarantees not contained or recorded herein shall be of any force or effect.</p>
<p>Signed</p>	<p>20 VARIATION AND CANCELLATION</p> <p>20.1 No agreement varying, adding to, deleting from or cancelling this Agreement shall be effective unless reduced to writing and signed by or on behalf of the parties.</p>
<p>Signed by Parents</p>	<p>21 INDULGENCES</p> <p>21.1 No indulgence granted by a party shall constitute a waiver of any of that party's rights under this Agreement.</p>

Mother's Particulars

Full Names

ID Number

I am the Mother of the unborn child ("my Child") whose Cord Blood and Cord Tissue is to be collected at the time of its birth.

I am entitled and duly authorized to sign this document on behalf of my Child. I authorize Netcells to receive, process and test the Cord Blood and Cord Tissue from the placenta and umbilical cord and to cryopreserve and store the Stem Cells contained therein (collectively, "Cord Blood and Cord Tissue") in accordance with the accompanying Community Cord Blood and Tissue Storage and Related Services Agreement. I authorize the South African National Blood Service (SANBS) and Ampath Laboratories to perform tests on my blood for transmissible

diseases, known as Maternal Blood tests. I authorize Oncolab to perform Human Leukocyte Antigen (HLA) typing and Colony Forming Unit (CFU) tests on my child's cord blood sample, on behalf of the South African Bone Marrow Registry (SABMR) for the results to be placed on their donor registry. HLAs are proteins found on most cells in your body. Your immune system uses these markers to recognize which cells belong in your body and which do not. HLA testing allows SABMR to match the cord blood with a recipient in need of a transplant.

Should the mother be unable to sign due to medical reasons, the father, or designated legal guardian of the unborn child may sign consent.

1. What are Stem Cells?

Stem Cells are the earliest cells of a developing embryo that differentiate to form all the cells of the human body. Researchers have found that Stem Cells remain in our bodies to maintain and repair our organs throughout life. Stem Cells are also found in the blood and tissue of the umbilical cord and placenta of newborn babies, which are normally discarded after birth.

Cord Blood contains blood forming Haematopoietic Stem Cells ("HSCs") and the main uses of these are in the treatment of the following groups of disease:

- Malignancies (Leukaemia, lymphoma, multiple myeloma, solid tumours);
- Anaemia (Fanconi's Anaemia, sickle cell disease, Thalassaemia);
- Bone marrow failures (Aplastic anaemia, pancytopenia);
- Immunodeficiency (SCID, Kostmann syndrome, Wiskott-Aldrich syndrome, lymphoproliferative disorder, ataxia telangiectasia, Di George syndrome);
- Inborn errors of metabolism (Adrenoleukodystrophy, Gaucher's disease, Krabbe disease, Niemann-Pick syndrome, Tay-Sachs disease).

Cord Tissue is rich in Mesenchymal Stem Cells ("MSCs"). MSCs do not have proven uses yet, and are being investigated for use in a variety of aesthetic and medical conditions that include:

- Skin regeneration (wound healing and burns, scar remodeling, pigmentation disorders);
- Neurology (nerve regeneration and repair);
- Orthopedics (cartilage, bone repair);
- Sports injury (tendon, ligament repair);
- Cardiology (heart muscle regeneration);
- Reconstructive surgery (fat grafts); and
- Other possible clinical areas.

Place Barcode Here

2. How is the Cord Blood Collected?

- 2.1. A Collection Kit is provided for the collection of the Cord Blood, which is taken to the birth of my Child and handed over to the Healthcare Professional that will perform the collection.
- 2.2. The collection bag is packaged in a sterile manner and needs to be opened on a sterile tray.
- 2.3. After my Child is born (via vaginal delivery or Caesarian section) the umbilical cord is clamped and my child is safely handed over.
- 2.4. The Healthcare Professional will clean the umbilical cord with a suitable antiseptic to limit contamination but this does not eliminate all risks of contamination of the blood. Then the needle of the collection bag is inserted into the umbilical vein of the umbilical cord. The bag will fill with Cord Blood. Once the flow of blood stops, the needle will be removed from the umbilical cord vein.
- 2.5. The clamps are closed and a knot will then be tied on the main line of the tubing just above the bag. The Cord Blood bag will be packed into the temperature insulating bag and placed back into the Collection Kit for courier to the laboratory.

3. How is the Cord Tissue Collected?

- 3.1. Cord Tissue is collected after the Cord Blood is collected and the placenta delivered.
- 3.2. The Healthcare Professional will clean the cord with a suitable antiseptic to limit contamination but this does not eliminate all risks of contamination in the final product. A 10-15cm piece of umbilical cord is cut and will be placed inside the tube provided in the Collection Kit to be couriered to the laboratory.

Initial

YI

4. Collection Risks and Consent

- 4.1. I will request that my Healthcare Professional collects the Cord Blood and/or Cord Tissue using the Collection Kit provided by Netcells;
- 4.2. I understand that, under normal circumstances, collection should never interfere with the birthing process and cause me no discomfort or pain;
- 4.3. I understand that there may be complications at birth that will make it impossible or problematic to collect the Cord Blood and/or Cord Tissue, and for these reasons, including the protection of my child and myself, my Healthcare Professional would be entitled to refuse to collect the Cord Blood and/or Cord Tissue. I will not hold Netcells or my Healthcare Professional responsible for my Healthcare Professional's decision not to collect the Cord Blood and/or Cord Tissue at the time of the birth.
- 4.4. I shall have the opportunity to deny or withdraw consent to the procurement procedures without affecting my access to or quality of medical care.
- 4.5. I understand that there is always a risk of bacterial and/or fungal contamination when collecting Cord Blood and Cord Tissue. The contaminating bacteria and/or fungus is usually a naturally occurring contaminant of the birthing canal. Netcells tests every cord blood unit for these contaminants.
- 4.6. I confirm that I am not aware of a current infection for any of the following which would prevent me from being able to store my child's cord blood samples with the Netcells Community Bank: H.I.V, HTLV I and II, CMV, Hepatitis B or C, Syphilis, Malaria, Chagas Disease, Toxoplasmosis, Tuberculosis, Epstein-Barr Virus, West Nile Virus or Zika Virus.
- 4.7. I understand that the Cord Blood and Cord Tissue collected may be insufficient and/or not viable for storage with Netcells and/or SABMR and/or transplantation and/or any other purpose;
- 4.8. I record and agree that I have been fully informed about the procedure for collecting Cord Blood and Cord Tissue and hereby consent to allow my Healthcare Professional to collect the Cord Blood and Cord Tissue after the birth of my Child and to furnish it to Netcells for Testing, Processing and Storage.

5. Risks Involved in Storage and Use

- 5.1. I understand that there are no assurances that any benefits of storing my Child's Stem Cells will be obtained;
- 5.2. I understand that the transplantation of Cord Blood and Cord Tissue Stem Cells is a relatively new procedure that may offer possible future benefits to my Child and other beneficiaries, who are found to be a match on the SABMR, in treating certain diseases;

- 5.3. I understand that my Child's Cord Blood Stem Cells are not stored exclusively for use for my Child or any family member who is an HLA-type match, and that I, the Mother of the Child, have opted to place my child's cord blood stem cell unit on a donor registry to be given to a patient in need, should a match arise;
- 5.4. I understand that Netcells, in partnership with the SABMR (and Oncolab) will perform HLA-typing on the Cord Blood prior to storage; which results will be placed on SABMR's donor registry who will therefore be able to suggest donation of my Child's Cord Blood to persons not known to me, should compatibility arise.
- 5.5. In the event the cord blood unit is donated to a recipient in need and the donor child falling ill following the use of his/her stem cells, if the donor child and SABMR receives an instruction from his/her treating physician and/or transplant center which indicates that the child requires a stem cell transplant, the child will then have access to the donor registry and the SABMR's resources to assist in finding a potential cord blood unit match or an adult donor within their repository.
- 5.6. I understand that there are several instances in which the use of my Child's Cord Blood and/or Cord Tissue Stem Cells for herself/himself would not be recommended (for example certain inherited diseases);
- 5.7. I acknowledge my responsibility to notify Netcells if my child is diagnosed with any genetic or serious medical condition that may affect the use of the Stem Cells in the future. The contact details can be found on the Next Biosciences website.
- 5.8. I acknowledge that there are alternative sources of Stem Cells such as bone marrow, peripheral (circulating) blood and adipose tissue, that could be accessed from my child or possibly a suitable matching donor, should I decide not to store my Child's own Cord Blood and/or Cord Tissue Stem Cells;
- 5.9. Pertaining to Cord Blood Stem Cells only,
 - 5.9.1. I understand that the likelihood of using my Child's Cord Blood Stem Cells is limited and that it is highly likely that they may never be used;
 - 5.9.2. Even though there is a good chance of a suitable match, I understand there are no guarantees that the Cord Blood Stem Cells will be a match for other family members;
 - 5.9.3. I understand that there is a likelihood of my Child's Cord Blood Stem Cells being a match for a patient in need, and as such will be accessed through SABMR;
 - 5.9.4. I understand that Cord Blood Stem Cells contaminated by bacteria that is sensitive to an antibiotic can be stored, but there is no guarantee that the transplanting physician will accept the sample for transplant which will be dependent on the clinical situation at the time. I acknowledge that we do not know what future medicine will bring and perhaps this contamination will not be an issue in the future.
 - 5.9.5. I understand that if the Cord Blood Stem Cells are contaminated by a Fungus or an antibiotic resistant bacteria, they cannot be stored on the SABMR donor registry, however they can still be stored with Netcells Private Bank but there is no guarantee that the transplanting physician will accept the sample for transplant which will be dependent on the clinical situation at the time. I acknowledge that we do not know what future medicine will bring and perhaps this contamination will not be an issue in the future.
- 5.10. Pertaining to Cord Tissue Stem Cells only,
 - 5.10.1. I understand that there is the likelihood that my Child's Cord Tissue Stem Cells may never be used;

Place Barcode Here

Initial

44

- 5.10.2. I understand that Cord Tissue is processed with antibiotics (specifically including penicillin) and may be exposed to enzymes and other possible allergens during processing, Stem Cell extraction, proliferation and storage. These components are washed out before therapeutic use, but trace amounts may still be present in the final product. Transplant may be contraindicated based on the recipient's allergy profile. This is based on current known best practice.
- 5.10.3. If the Cord Tissue Stem Cells are required, I understand that the cord tissue will need to be thawed and the Stem Cells extracted. There is no guarantee on the number and viability of the cells that will be extracted as not all cord tissue yields stem cells that can be cultured, due to patient biological variability. I further understand that additional laboratory work will be required to expand the isolated cells to produce sufficient cells for therapy. Depending on the specific treatment required other laboratory work may be additionally required. Netcells doesn't currently offer this service and the cost of this extraction and culture by another laboratory, will be for my own account, and/or that of my Child.
- 5.11. I understand that the Cord Blood and/or Cord Tissue Stem Cell harvests are typically low in volume and could be insufficient (without expansion or supplementation) for a transplant. If the cord blood stem cell count does not meet the criteria for storage as set out by the SABMR according to the minimum registry storage limits, the sample cannot be placed on the donor registry;
- 5.12. I understand that there is a documented and unavoidable cell loss during the Cryopreservation and thawing process, even though Netcells uses internationally accepted methodology. We are therefore not able to determine post thaw cell yield at time of Cryopreservation.
- 5.13. As this science is relatively new, the longest recorded period of viable thawed Stem Cells has been for 23 (twenty three) years (Broxmeyer H.E et al; Hematopoietic stem/progenitor cells, generation of induced pluripotent stem cells and isolation of endothelial progenitors from 21- to 23.5-year cryopreserved cord blood; Blood. 2011 May 5; 117(18): 4773-4777. Pre-published online 2011 March 10. doi:10.1182/blood-2011-01-330514), and as such, I understand that there are no guarantees that the Cord Blood and/or Cord Tissue can actually be stored indefinitely.

6. Maternal Blood Testing and Health Questionnaire

- 6.1. Maternal Blood Testing is required for Cord Blood and Cord Tissue Stem Cell storage according to the South African National Health Act (61/2003) Regulation on Stem Cell Banks (Reg 183).
- 6.2. I agree to fill out the Maternal Health Questionnaire in the Collection Kit and return the form to Netcells with the Collection Kit. I understand that this part of my medical history will only be reviewed by the appropriate Netcells staff.
- 6.3. I agree to provide information related to our family's medical and genetic history, where necessary and available.

- 6.4. I understand that I **must** have a sample of my own blood taken by venipuncture (the usual method for blood tests) within 7 Days prior to delivery or 7 Days after the delivery, in order to be tested for Transmissible Diseases. Should I fail to do so, the stem cells will be stored privately, and I will be liable for the additional costs of Private Stem cell banking;
- 6.5. I am responsible for and will ensure that I have my blood sample taken by a Healthcare Professional at the hospital or clinic where I am delivering my baby. The blood sample will be taken in the blood tests tubes provided by Netcells in the Collection Kit.
- 6.6. I understand that there is a slight risk of bruising, discomfort, inflammation, or infection at the site of the blood draw.
- 6.7. My blood will be tested for certain infectious diseases, including:
- 6.7.1. Human Immunodeficiency Virus (HIV) -1 and -2 (AIDS causing virus);
 - 6.7.2. Hepatitis B and Hepatitis C Viruses (viruses that affect the liver causing hepatitis, jaundice and liver dysfunction);
 - 6.7.3. Syphilis (a contagious disease that is characterized by genital ulcers, skin rashes and lesions that can affect all organs of the body).
 - 6.7.4. Cytomegalovirus (a common herpes type virus that goes unnoticed in healthy individuals but can be life-threatening in immune-compromised patients).
 - 6.7.5. Human T-cell Lymphotropic virus (HTLV I/II) (a sexually transmitted virus that can cause adult T cell leukaemia/ lymphoma as well as neurological disorders such as paralysis of lower limbs. It can also be transmitted via blood or body fluid transmission).
 - 6.7.6. Toxoplasmosis (a disease that results from infection with the Toxoplasma gondii parasite, one of the world's most common parasites). Infection usually occurs by eating undercooked contaminated meat, exposure from infected cat feces, or mother-to-child transmission during pregnancy.
- 6.8. Netcells' and SABMR medical doctors will review the results of the Testing.
- 6.9. I understand that abnormal results will be reported to me. Should my test results be positive for any of the following: HIV, Hepatitis B or C, HTLV I/II, Syphilis or Toxoplasmosis, I will have a confirmatory test done and if positive for Hepatitis B or C I will have a test done to determine if I am a carrier of this virus (i.e. another sample of my blood will be taken and tested). If the confirmatory tests for HIV, HTLV I/II, Toxoplasmosis and Hepatitis B or C carrier are positive, the Cord Blood Stem Cells cannot be added to the SABMR donor registry. I can choose to continue storage for personal use only and the Cord Blood and Cord Tissue Stem Cells will be stored in permanent quarantine with other samples of the same infectious disease. I understand that I will be required to sign an Addendum to this Informed Consent should my blood test positive for the above-mentioned infectious diseases. The cost of the confirmatory blood tests will be for my own account.
- 6.10. I understand that CMV and Syphilis positive test results indicating a previous, but not current infection, will not preclude the storage of the Cord Blood Stem Cells on the SABMR donor registry or the final storage of the Cord Blood Stem Cells and/or the Cord Tissue.
- 6.11. I understand that if I am aware of a current or past infection for HTLV I/II and HIV, my child's cord blood and tissue sample will not be deemed eligible for the donor registry and I will need to register for private stem cell banking.
- 6.12. I understand that if I had an infection for Zika Virus, Malaria, T.cruzi or Toxoplasmosis during this pregnancy, my Child's Cord Blood Stem Cells will not be deemed eligible for the the SABMR donor registry. I will need to register for Private Stem Cell Banking and am not eligible for storing with the Community Bank.

Place Barcode Here

Initial

Y

- 6.13. If at any time prior to the birth, I am unsure as to whether or not I have a current or past infection with HIV or HTLV I/II, I agree that the onus is on me to test to confirm any uncertainty within 7 days prior to my child's birth, in order to qualify for registering and storing with the Netcells Community Bank (refer to sample journey map attached hereto, Annexure A).
- 6.14. I hereby consent to Netcells' disclosure of the results of my blood tests to my Healthcare Professional, to SABMR, to any other Stem Cell storage facility to which I have authorized transfer of the Stem Cells, to the transplantation service in the event the Stem Cells are released for use, and to any government agency to which Netcells may be required to report such results under applicable law and regulations.

7. Testing

7.1. Cord Blood

I understand that:

- 7.1.1. Netcells will undertake tests on my Child's Cord Blood to ascertain the nature, number and viability of the Stem Cells to be Cryopreserved;
- 7.1.2. Netcells will partner with Oncolabs, through SABMR, to perform an HLA-typing test and a Colony Forming Units (CFU) Assay on my Child's Cord Blood to ascertain the tissue type and potency of the stem cells for SABMR records;
- 7.1.3. Netcells will not release the Stem Cells until Netcells has received approval from the recipient's transplant physician and parent(s);
- 7.1.4. Reference samples of the Cord Blood will be Stored for future Testing of HLA-type, cell count and viability upon thawing and any infectious disease tests required by the transplant physician or clinic. These are small in quantity and do not significantly affect the overall number of Cord Blood Stem Cells stored. One of the reference samples will be used to perform the HLA-typing test and CFU Assay on my Child's Cord Blood, as per 7.1.2.

7.2. Cord Tissue

I understand that:

- 7.2.1. Viability testing will be carried out on the Cord Tissue prior to storage.
- 7.2.2. Once the cells are required for therapy and have been removed from storage and the stem cells isolated from the Cord Tissue, they will be tested for quantity and quality according to the requirements set by the transplanting facility. Due to rapidly changing clinical practice, the test results may not meet their requirements at that time.

8. Preparation of Stem Cells for Transplant

- 8.1. Cord Blood Stem Cells may require washing after thawing, for transplantation. They will be transported in either their thawed or

frozen state (to be thawed at the bedside) and infused into the patient's blood stream.

- 8.2. Cord Tissue requires further preparation for transplant. The mesenchymal rich fraction of the Wharton's Jelly is stored and as such the Cord Tissue Stem Cells are not extracted from the cord tissue before storage. When required for transplant, the Cord Tissue will be transferred to another laboratory for the additional work required. There is an additional cost for this laboratory work which will be for my account, and/or that of my Child.

9. Disclosure of Health Information

- 9.1. Netcells, SABMR, Oncolab, SANBS and Ampath will maintain the confidentiality of my health information that I provide to them concerning myself, my family and my Child.
- 9.2. I do however understand that Healthcare Professionals may need such information to provide treatment to me and/or my Child and/or matching relative and that government agencies may be entitled to obtain such information under applicable law and regulations.
- 9.3. I authorize Netcells and SABMR to disclose such information to Healthcare Professionals that are treating me and/or my Child and/or matching relative and/or SABMR recipient; and to government agencies as may be required under applicable law and regulations.
- 9.4. I authorize Netcells and SABMR to disclose such information for research purposes in an anonymous and deidentified manner and always maintaining Netcells' and SABMR's confidentiality obligations in terms hereof.

10. Compliance with the protection of Personal Information Act (POPIA)

- 10.1. I understand that Netcells and the SABMR take the privacy of its patients very seriously and have implemented reasonable security measures to guard against the unauthorised disclosure of private patient information.
- 10.2. I acknowledge that my personal information, or that of my child, may be disclosed within the Netcells and SABMR team for the purposes of providing services.
- 10.3. I acknowledge that my personal and special personal information, and that of my child, will be kept for the required storage and retention periods according to and in line with legislation/regulations applicable to the medical and healthcare industry.

11. Cord Blood Disposal

- 11.1. If the Cord Blood that is collected has low cell counts or low cell viability and is not recommended for storage according to Netcells minimum storage limits and standards at the time of processing, I will be informed by Netcells about the possible options available to me.
- 11.2. I have the choice to proceed with storage and will sign a disclaimer in order to do so, or if I decide not to proceed with storage I will sign a disclaimer to either donate the Cord Blood for internal research/validation purposes or to discard it.

Place Barcode Here

Initial

Y

11.3. I understand that Netcells will retain confidentiality of the sample and that the Stem Cells will not be used for any other purposes than those set out in the Storage Agreement and Informed Consent.

12. Validation

12.1 I authorize Netcells to cryopreserve and store any excess Cord Blood and/or Cord Tissue (that would normally be discarded) and routinely perform validation testing on this, to ensure the ongoing viability of the stored Cord Blood and/or Cord Tissue,

13. Disclosure of Information

13.1 I authorize Netcells to use (research, study and publish) information obtained from the Collection, Testing, Processing, Cryopreservation and Storage of the Cord Blood and/or Cord Tissue Stem Cells in an anonymous and deidentified manner.

14. Information Services

14.1 I have received information regarding the risks, benefits, discomforts, and alternatives to Stem Cell Collection, Testing, Processing and Storage.

14.2 I am entitled to donor advocacy services in the form of access to the Netcells' and SABMR's medical staff to ask questions and have these answered to my satisfaction. I am also able to ask my own Healthcare Professional questions should I need to.

14.3 I have received a written copy of Netcells' and SABMR's contact information for any questions related to cellular therapy products.

15. Warranties and Limitation of Liability

15.1 I confirm that I have read, understood, consented, and agreed to be bound by all parts of the Netcells Community Cord Blood and Tissue Storage and Related Services Agreement, in particular Clause 11 and 12 of the Agreement.

15.2 Notwithstanding anything that may be construed to the contrary, the maximum amount of any and all liability which Netcells (and its respective shareholders, directors, officers, employees and agents, including marketing agents and other representatives) may incur to the Client in terms of processing, testing and storage of the stem cells, or in respect of any and all actions or omissions of Netcells under any and all circumstances shall be the total amount paid by the Client to Netcells.
